

Most important features I want  
to show:

---

\* Radial menus

\* Student customised interface.

\* Timetable for student

M	T	W	T	F

Star. ~~for~~  
notification.

\* Focus on one class

class  
where  
when  
notifications,  
assignments.

\* touch & pause on a class to bring up menu, slide  
to directions

\* Directions to main class.

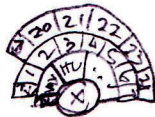

---

Nice to show features, time permitting:

---

\* Looking for a library book

\* Looking for a tutor's room using  
scroll wheel.

# List of screens

Start screen + hints on usage.

Start screen + radial menu. (student)

map showing current location

map showing current location + radial menu.  
(timetable)

student's timetable

student's timetable w/ class touched.

details of class -

details of class + radial menu  
(directions).

map overview - current location  
- destination

map overview - c.d. & d. + radial menu  
(by foot)

" " + radial menu  
(by foot + quickest)

map overview w/ route btwn c.d. & d.

zoom in + first set of directions.  
to c.l.

travelling the route + set of directions  
- iterate till outside building

go through door

change to inside view of building

travelling route map w/ directions  
- iterate till outside classroom

destination reached.

Hours	W	T	W	Th	F
8-9		am			
9-10	am				am
10-11	am		am		am
11-12					

touch to pull up info on the specific class

touch empty space to add a class, study session or sitting like ~~meat~~ break or rec/centre class.
